

SCEPTER BIO

Brothers **Jeff and Joe Kirby** first launched **Scepter** in the small mid-western city of **Wichita, Kansas** in 1987 before many of the bands fans were even conceived. Throughout the years, the **Kirby brothers** have built upon the foundation of **Scepter**, never letting up and always driving what band represents; power and authority. A few line-up changes and hundreds of songs and shows later, the band relocated to **Dallas, Texas** and solicited the efforts of drummer **Chris “Mank” Menard** in 2001 to complete the band’s latest lineup featuring **Jeff Kirby** on vocals and bass guitar, **Joe Kirby** on lead guitar and **Mank** on drums.

Throughout the band’s history, **Scepter** has released several independent albums including *Depletion of Time* (1990), *Three* (1992), *Humerus* (1994), *Eat to the Feet* (1998), *Scepterated At Birth* (2001), *It’s The Gettin’ Up That Gets Ya* (2002), *Seven By Three* (2007), and *Point of Impact* (2008). **Scepter’s** latest release, ***Now and Again***, (available on iTunes and all major digital download venues) was completed in late 2012 and illustrates the bands years of influences and roadworthy experience-based sound geared for today’s diverse audience with elements of hard rock, mainstream, alternative and punk... the SSS “Scepter Secret Sauce”. Songs like **Love in the Personals**, a catchy song about internet dating, has already become a radio favorite, gaining extensive airplay at stations such as **liveandloudradio.com** online.

The bands goal with this release is to continue to gain media attention, secure major label support, and make yet another mark for the history of **Scepter**, one of the longest lived independent acts known to mankind... or should we say, **Mank** kind.
